Subject: Testimonial

Choosing Praapthi to do the sound design for our maiden production, "Dhaara-The Divine Rainfall" was a wise decision that we made. Having already worked with Deva for an arangetram, we were so particular in engaging Praapthi again. His professionalism is evident by the way he does the sound check everytime because he has the experience of working with almost all the musicians in Singapore. He also has a wide knowledge about the sound systems at various venues, so the sound check is completed in no time. Thank you for patiently waiting for our rehearsal to complete for the sound balancing and also for helping us to record the audio track of the whole event. Looking forward to work with you again in the near future....
